

RentMaikar Operations Platform

Comprehensive Feature Catalog & Architectural Specification

September 2026 | Version 2.4-Production

68 Modules	71 Routes	96 Pages	436 UI Elements	8 RBAC Roles
Total Core Features	Active App Routes	Page Controllers	Modular Components	Specialized Roles

1. Public Marketplace & Vehicle Discovery

10 Features

- Curated Vehicle Catalogue**
Three-tier segmented fleet browsing (Budget, Standard, and Premium cars) with responsive cards.
- Dynamic Rental Calculator**
Real-time daily, weekly, and deposit rate calculation per vehicle category.
- Region & Currency Switcher**
Multi-region support with dynamic regional pricing and local localization.
- Interactive Product Tour**
Multi-step interactive onboarding walkthrough for new prospective drivers and owners.
- How It Works Flow**
Guided step-by-step visual workflows for both prospective drivers and car owners.
- FAQ & Help Center**
Searchable knowledge base covering security deposits, insurance, repairs, and platform policies.
- Direct WhatsApp & SMS Integration**
Pre-filled customer communication links for rapid conversion and inquiries.
- Responsive Vehicle Filtering**
Multi-parameter search by transmission (Auto/Manual), fuel type, model year, and seat count.
- Vehicle Detail Showcases**
High-resolution galleries, vehicle specs, inspection status, and booking terms.
- Legal & Compliance Pages**
Public terms of service, privacy policy, and driver agreements.

2. Identity, Onboarding & Compliance (KYC/AML)

8 Features

- **Multi-Role Authentication**
Unified authentication supporting Drivers, Owners, Admins, and Support staff.
- **Google OAuth 2.0 Single Sign-On**
One-click authentication via Google Identity Services and Supabase Auth.
- **Magic Link & Email Verification**
Passwordless authentication and transactional verification workflows.
- **Automated Driver KYC**
Persona inquiry integration with Nigerian Driver's License and NIN validation.
- **Referee Attestation Portal**
Automated SMS/email dispatch allowing guarantors to attest for drivers online.
- **Criminal & Background Checks**
Automated police clearance and driving violation audit tracking.
- **Vehicle Owner Onboarding**
Multi-step wizard collecting registration documents, proof of ownership, and insurance.
- **Proxy Consent Management**
Digital signature collection for background checks and location tracking.

3. Driver Operating Suite

9 Features

- **Driver Command Dashboard**
Active rental status, daily countdowns, and upcoming payment reminders.
- **Instant Vehicle Reservation**
Direct booking requests with automated deposit calculations.
- **Driver Training Academy**
Video tutorials, road safety quizzes, and completion certification.
- **Weekly Vehicle Inspections**
Mandatory photo-based damage and odometer upload with comparison to check-in logs.
- **Driver Wallet & Billing History**
Transparent ledger of completed payments, deposit balances, and invoices.
- **In-App Messaging & Notifications**
Real-time direct alerts for payment due dates and maintenance notices.
- **Incident & Accident Reporting**
Guided collision reporting with location tagging and photo uploads.
- **Emergency SOS Trigger**
One-tap rapid assistance dispatch for breakdowns or security incidents.
- **Profile & Documents Vault**
Secure portal to renew expired licenses and insurance documents.

4. Vehicle Owner & Fleet Management

9 Features

- **Owner Fleet Dashboard**
High-level earnings, fleet utilization rates, and active vehicle statuses.
- **Vehicle Listing & Registration**
Vehicle upload wizard with VIN decoding, specs, and custom pricing rules.
- **Real-time Live GPS Tracking**
Interactive map rendering vehicle locations with speed and ignition status.
- **Remote Engine Immobilization**
Instant remote engine cut-off command for security breaches or defaults.
- **Earnings & Payout Engine**
Automated calculation of net payouts after platform commissions.
- **Withdrawal Request Center**
Direct bank transfer requests with multi-stage approval workflows.
- **Maintenance & Service Scheduler**
Oil change, brake pad, and tire service mileage alerts and expense logging.
- **Inspection Approval Review**
Review and approve driver-submitted weekly condition photos.
- **Rental Agreement Archive**
Legally binding digital contracts generated for each active driver placement.

5. IoT Telemetry & Hardware Operations

7 Features

- **Traccar GPS Integration**
Automated ingestion of vehicle GPS coordinates, heading, and battery levels.
- **Hologram Cellular SIM Diagnostics**
Cellular data usage, connectivity health, and device status monitoring.
- **Proximity Matching Algorithm**
Mathematical geo-proximity calculation pairing drivers with nearby vehicles.
- **Geofencing & Boundary Alerts**
Virtual perimeter definition with instant notifications on boundary violations.
- **Hardware Provisioning Queue**
Pre-deployment testing flow for new GPS trackers and OBD-II units.
- **Traccar Command Console**
Direct manual dispatch of hardware commands (status queries, remote reboot).
- **Device Health Dashboard**
Battery degradation and signal strength alert system across the fleet.

6. Support & Specialist Portals

6 Features

- **Legal Support Portal (/support/legal)**
Contract review, legal escalation tracking, and regulatory filing logs.
- **IoT Hardware Portal (/support/iot)**
SIM card troubleshooting, device assignment, and telemetry anomaly logs.
- **Vehicle Support Portal (/support/vehicle)**
Mechanical claim handling, roadside assistance dispatch, and repair estimates.
- **Insurance Support Portal (/support/insurance)**
Accident claims processing, third-party liability records, and payouts.
- **Unified Support Ticket Queue**
Cross-departmental task assignment and SLA response time tracking.
- **Support Role Impersonation**
Secure session impersonation to troubleshoot issues from the user's perspective.

7. Treasury, Payments & Financial Reconciliation

10 Features

- **Multi-PSP Payment Gateways**
Native integration with PayPal (Global/US), OPay (Nigeria Cashier), Paystack, Flutterwave, and Stripe.
- **Settlement Reconciliation Engine**
Automated comparison of bank settlement reports against system invoices.
- **Automated Rental Escrow**
Segregated deposit holding and conditional refund authorization.
- **Billing Reconciliation**
Audit of expected driver billing cycles against captured payments.
- **Ledger Discrepancy Detector**
Double-entry ledger audit identifying underpayments, overpayments, or duplicates.
- **Invoice Status Tracking**
Status tracking across Pending, Paid, Failed, Overdue, and Waived states.
- **Owner Withdrawal Payout Queue**
Batch review and disbursement approvals for owner earnings.
- **Payment Dispute Arbitrator**
Evidence collection and dispute management for chargebacks.
- **Payment Credential Health Monitor**
Real-time webhook and API key status checks for payment providers.
- **Financial Data Export & Audit**
CSV and PDF export generator for external accounting.

8. Administrative Command Center & Platform Tools

9 Features

- **Executive KPI Dashboard**
Platform-wide revenue, fleet occupancy, and active driver metrics.
- **Live Secrets & API Key Vault**
Centralized environment variable, GCP credential, and API key management.
- **Vehicle Approval & Ingestion Queue**
Review pipeline for new vehicles submitted by owners.
- **Bulk Vehicle Import**
CSV/spreadsheet parser for fleet owners importing multiple cars at once.
- **Unified Operations Inbox**
Consolidated omnichannel messaging interface for customer support.
- **VoIP & CPaaS Call Center**
Browser-based calling, SMS dispatch, and call log tracking.
- **Email & SMS Delivery Logs**
Delivery rates, bounce tracking, and consent audit logs (TCPA/NDPR compliant).
- **Interactive Tour Analytics**
Funnel tracking of users engaging with the introductory tour.
- **Comprehensive System Audit Log**
Immutable record of all administrative actions, logins, and status overrides.
